Claims 1-49 are pending.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-10, drawn to composition consisting essentially of a cationic, lipophilic, water-soluble molecule, and an anionic ligand for a cellular receptor. .

Group II, claims 11-43, drawn to compounds of formula I.

Group III, claims 44 and 45, drawn to a method of enhancing oxygen delivery to a tissue or organ of a mammal.

Group IV, claim 46, drawn to a method of treating a mammal afflicted with anemia, coronary infarction and other diseases as listed in this claim.

Group V, claim 47, drawn to a method of treating different from claim 46.

Group VI, claim 48, drawn to a method of improving the oxygen delivering capability of mammalian blood.

Group VII, claim 49, drawn to a method of incorporating a therapeutically useful substance into mammalian red blood cells.

The inventions listed as Groups I to VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. See embodiments listed from page 30-36.

Applicant is required, in reply to this action, to elect a single species from the elected group to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1616

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic, 1-49.

The species listed in the disclosure do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features. For example the search for invention of group I will not be the same as for other groups. These inventions do not have special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined along with the election of species from the elected group even though the requirement be traversed (37 CFR 1.143).
